Victoria Place

Gardening Club

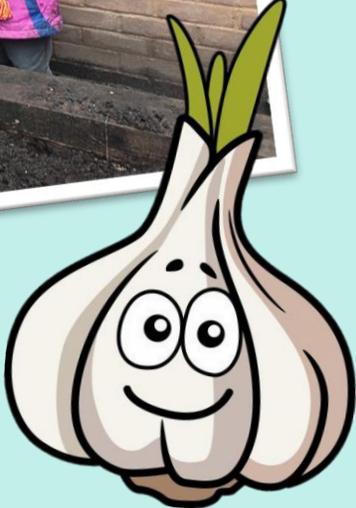

"These are the roots, we are going to separate the bulbs and plant them into our soil".

"They will grow bigger & bigger".

We have been in the garden and have prepared our soil for growing vegetables. We have separated our garlic cloves and placed them into the soil.

We dug a hole and we gently transferred our lavender from its pot to our growing bed. We found wiggly worms and snails. We also found grubs which may be from a moth or beetle.

Or a butterfly like 'The Hungry Caterpillar'

This is a larvae, it can grow in to a beetle or a moth.

Foil Painting

Creating art using foil and paint to offer a new sensory experience supporting physical, cognitive, social and emotional development.

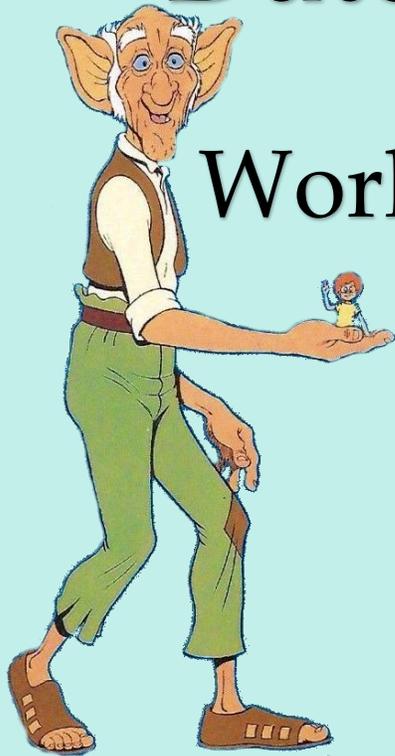

Valentine's Day

Love is in the air, our Little Stars have been creating cookies and ornaments for their mummies and daddies. Decorating ornaments using paint, glue and glitter.

Dates for your Diary!
